Circular Saw Machine Model : CSM-80

"SPM" Circular Saw Machine, CSM-80 is a very rigid, sturdy and torsion free construction.

Saw Head :

A rigid structure equipped with box type linear guide ways ensures the movement more stable and smooth.

The saw blade has sufficient drive power for variety of bar materials. The rapid approach system ensures the minimum time for cutting operation.

The servo feed saw head leads to accurate, smooth and low vibration during cutting.

Clamping & Feeding :

The bar clamping done by hydraulically operated vices. The moving jaws of both vices, clamp the bar with sufficient variable hydraulic pressure for rigid clamping.

The feed length of bar is controlled by Servo motor.

Features :

- Programmable Operation Display. (10" TFT Color Liquid Crystal Display)
- Hydraulic Clamped front & rear Vices.
- Hydraulic Sorting Chute.
- Electromagnetic Powder Brake.
- Automatic Chip Conveyor.
- Oil Mist Filter (Optional).
- Automatic Bar Feeder - 6 Meter (Optional).
